HOW TO CHANGE - Migrant work between emergency, changes and rights

FOREWORD

We are witnessing important changes in our society: The covid-19 outbreak has demonstrated that the foundation of our way of life was built on clay and that there is the need to accelerate the process toward a more sustainable and inclusive society.

These transitions will inevitably reflect on the job market and the Italian Diversity Dialogue Fora could be an opportunity to reflect on how these changes could affect immigrant workers, especially the ones with weak permission of stay and low skills and to showcase some ideas and proposals to reduce the risk of exchanging personal rights for a contract.
