MAX is a project funded by the AMIF to improve the public image of migrants in Europe by changing the narrative around the immigration discourse and putting on the front the stories of real people. In this context, MAX is organising online DDF in 15 European countries to discuss with a large number of different speakers and participants, how to better support people with a migrant background with the goal of removing obstacles to maximise the contribution they can bring to our society.

For our French edition, we are organising a 2-day session DDF focused on labour market integration and education.

During the second day of the French DDF, we would like to have a common discussion with a large number of different speakers (school directors and teachers, municipal officer, students and parents, local associations) on the methodologies applied in French schools to ensure social cohesion in a context of diversity, future challenges and existing good practices.

## Agenda
